OBJECTIVE

Seeking remote global opportunities in **Data Analytics / Analytics Engineering** to design scalable data solutions and deliver measurable business impact.

ABOUT

Data Analyst with 4+ years of experience transforming raw data into actionable business insights. Automated 24 manual reports, reducing preparation time by up to 50%, and developed 20+ interactive dashboards across Finance, Sales, Marketing, Operations, and Controllership.

Centralized data from 2 ERP systems, improving governance and accuracy through daily reconciliation. Built financial feasibility models that supported investment approvals, attracted external funding, improved cash flow forecasting, and enabled continuous evaluation of project profitability.

Skilled in SQL, Python (Pandas, NumPy, PySpark, Streamlit, Plotly), Power BI, ETL/ELT, and Data Modeling, with strong focus on automation, KPI tracking, and decision support.

SKILLS

- Programming & Data
    - Python (Pandas, NumPy, PySpark, Streamlit, Plotly)
    - SQL (queries, optimization, stored procedures)
    - DAX & M (Power BI languages)
- BI & Visualization
    - Power BI (Dashboards, Dataflows, Power Query, Paginated Reports)
    - Apache Superset
    - Tableau
    - Looker Studio
    - Data Modeling & Star Schema
    - KPI Tracking & Performance Monitoring
    - Data Storytelling & Visualization
- Data Engineering
    - ETL / ELT Pipelines
    - Data Integration (ERP & Multi-source)
    - Data Governance & Data Quality
    - Process Automation
- Other Tools
    - Excel (Advanced: Power Pivot, Power Query)
    - Git / GitHub (Version Control)
    - Microsoft Office 365
    - Basic Cloud: Azure Data Fundamentals
    - N8N

WORK EXPERIENCE

URBANIZAMOS INCORPORADORA – 07/2021 – NOW

Data Analyst

- Reporting Automation & Dashboards
    - Automated 24 manual reports, cutting preparation time from 4–5 hours to hourly updates in Power BI.
    - Optimized a key financial report, reducing processing time from 8 to 4 hours.

- Developed 20+ dashboards for Finance, Sales, Marketing, Operations, and Controllership, providing real-time insights.
- Data Governance & Systems Integration
    - Centralized and reconciled data from 2 ERP systems, improving accuracy and governance.
    - Implemented daily data validation processes to ensure consistency and reliability across reports.
- Financial Modeling & Decision Support
    - Built financial feasibility models that supported investment approvals and external funding.
    - Improved cash flow forecasting and ongoing profitability evaluation against business feasibility baselines.
- Cross-Department Collaboration
    - Partnered with all business units to deliver tailored analytics solutions.
    - Enabled leadership to track KPIs, evaluate performance, and make strategic decisions faster.

EDUCATION

- Bachelor's in civil engineering– UNIVERSIDADE FEDERAL DE GOIÁS (UFG)
- English: Full Professional Proficiency (technical reading, writing, meetings)
- Portuguese: Native

CERTIFICATIONS

- AI MAX – StartSe University – August 2024
- Advanced Excel – Faculdade Senai Fatesg – November 2017
